System Requirements For STL Import For Inventor:

The goal is to have a simple tutorial which will give you a good understanding of the basics of baking. I am going to try and limit the program to fairly minimal requirements. The goal is to create a clean easy to use package. Hard drive space of around 2 gigabytes is necessary,

but not necessarily required. You will need at least 5 megabytes of RAM. The program is divided into scenes, these scenes may be cycled. If you want to create individual cycles, then you need to save the settings and bake the cycles yourself. If you want to create a set
