i like it is very cool game is very great!. Remains a great fun educational game.. i tried to tab out of the game and rather than just minimizing there is a giant black/white box covering about 70% of my screen. i wouldn't care as much if this game wasn't as boring as it was. it's cute, its something but it's just ridiculously simple. i have spent maybe five minutes max at a time trying to play this game. as bright and neat as it is, the storyline is bland and dull and the game itself isn't exciting there just isn't a point to play. at first i recommended this game to someone, and now i regret it. on the off chance that they might actually buy the game and be as disappointed in it as i am, i don't want them to think that my taste in games is subpar. upsetting honestly, because i expected so much i generally love puzzles and colorful ones are the best way to go but. this is just simple and childish. its upsetting.. Not bad for a Proc-Gen, platforming romp. Does need some more generous treasure and enemy placement, though, especially in secret areas.. A clash of clans knockoff that pesters you to buy stuff with in-app purchases.

cons:

in-app purchases

whenever you try to log out, it comes up with a message that says to like them on facebook. you need to hit no and try again for it to log you out. literally.

a knockoff with nothing special about it

pros:
the graphics are good. that's it.

3/10, slightly worse than clash of clans.. Excellent. Very creative.

Your objective is to guess the object in the hidden picture. You can reveal a small portion of the picture by clicking, and of course, the fewer clicks you need, the better. There are hundreds of pictures for you to guess. And various potions to help you. Aside from these normal problems, there are some bizarre challenges, such as guessing a twisted picture, a mosaic-ed picture, a scrambled picture, and more.

Each chapter contains 16 puzzles, and between chapters there are search-for-hidden-object levels. What's creative about this is that, you don't just search for listed objects in the scene. Instead, you search for listed objects that SHOULD be in the scene but actually are NOT.

Recommended for everyone. Well, non-native players may need a dictionary, but still recommended. This is definitely one of the best games in Popcap complete pack.

+ creative playstyle
+ various powerups
+ lots and lots of levels
- occasionally a synonym of the correct answer is judged incorrect
9 out of 10, marvelous.

Like some other people, when I try to start the game, the Play and Configuration options are just greyed out and can't be selected. The publisher doesn't appear to support it either as it's not even listed on their website anymore.. A pretty solid puzzle game with time bending mechanics very reminiscent of Dark Cloud 2. However, the short length and unremarkable story make the asking price of \$4.99 hard to swallow. Get it on sale or in a bundle for sure.. Reminds me of Dark Cloud with Zeldalike dungeons. Great game.. This is a great co-op game! All about adventuring and surviving. It is really hard to find a co-op game that doesn't become super repetitive after a few hours. This one ramps up the difficulty pretty quick keeping it interesting and intense!

Yes, I managed to avoid flying into that sun only to panic and fly directly into an asteroid and explode instead! Yes, I was horrified and laughing at the same time. Yes, that bolder has three eyes and enjoys rolling around the planet. 10/10 would space again.

. Simple fun game, wish it had a bit more depth and a bit more movement options (ability to jump).

If you like classic style beat em up games, this has the basic formula down.. Wings of Prey is a hybrid between a flight sim and arcade turret game. The controls are a tad complicated and missions can be repetitive; But if you're willing stick with it, there are a few fun moments in the game. A warning though, you won't be able to finish the game as the last few missions are completely bugged and broken.

PROS

- The planes are very pretty, you can see the damage sustained on the plane when you are hit.
- A lot of planes available, each feel slightly different from each other.

CONS

- many planes are only available in multiplayer
- Missions are repetitive
- The voice overs made me want to shoot myself.
- Textures on the terrain can look very ugly.
- There is a lot of waiting time during missions before any action happens

Rating: 6.9/10. One of the best bullet hell game that I ever play. You couldn't bomb the enemies like the other game instead you must do suicidal move when the power full.

The soundtrack was awesome as well ...

Has many variety dolls ... which has awesome powers I love 2 dools in here .. they just reminded me of Raiden ships
